# Welcome to MS Access Migration Tool
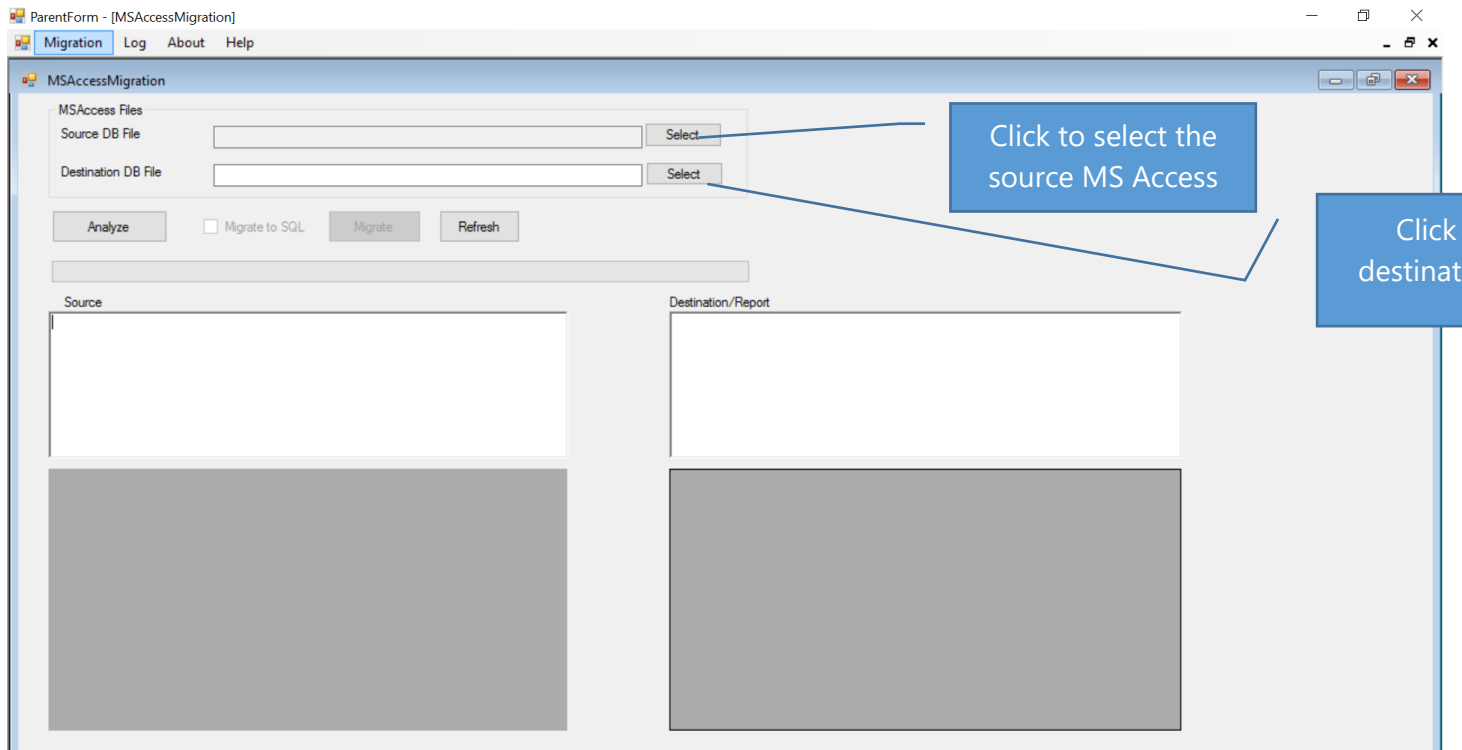

Simpler way to migrate MS Access Application.

Migration

Click on the **Migration** main menu item**.**

Below Migration form will prompt up.

1. Select Source MS Access DB file needs to be migrated.

2. Select Destination MS Access DB file if file already exists. You can type the path and file name in Destination text box as well.

3. Click **Analyze** button to analyze the source MS Access file.

4. Analysis will fill up the left side text box and grid as shown below.

Source

Source DBEngine Analysis

Tables   2
Queries   2
Forms   2
ExternalTables
Macros   0
Reports   2
Modules   1

	AccessObject	Object Type	Remarks	IsMigrated
▶	Table1	Tables	Internal	☐
	Table2	Tables	Internal	☐
	Query1	Queries	-	☐
	Query2	Queries	-	☐
	Table2Form	Forms	-	☐
	Table1Form	Forms	-	☐
	Table1Report	Reports	-	☐
	Table2Report	Reports		☐

5. Now click on the Migration button which will migrate the source MS Access DB to Destination MS Access DB. Background of the migrated Item will become green in the grid and **IsMigrated** column will be checked out as shown below.

	AccessObject	Object Type	Remarks	IsMigrated
▶	Table1	Tables	Internal	☑
	Table2	Tables	Internal	☑
	Query1	Queries	-	☑
	Query2	Queries	-	☑
	Table2Form	Forms	-	☑
	Table1Form	Forms	-	☑
	Table1Report	Reports	-	☑
	Table2Report	Reports		☑

6. After migration Destination left side pane controls display the migrated items summary and itemized details in the below grid.
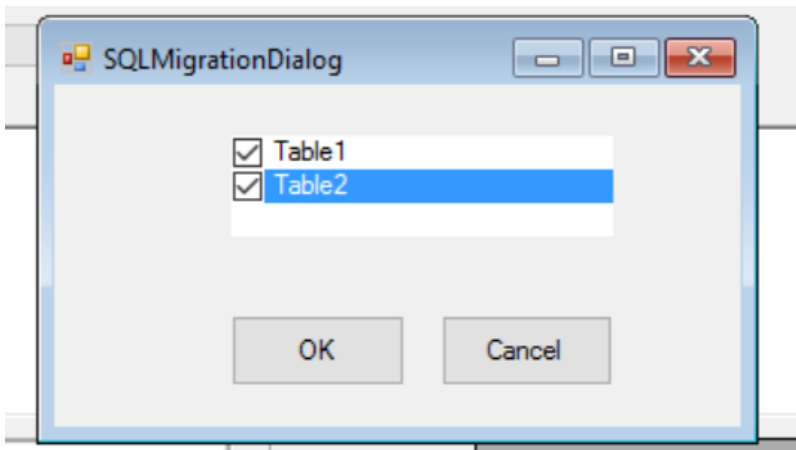

Migration with MS SQL Server

1. If it is required to migrate the local tables to sql server, check the **Migrate to Sql** checkbox.

   It will prompt the dialog box with list of local tables. Select the tables to migrate to sql server and click on **OK** button.
   Note: *Sqlconnection string is in the appsetting file.*

7. Now if you click the migrate button. Items will be migrated to destination access file and local selected tables will be migrated to sql server and tables will be linked to destination msaccess db.

Log

1. Click the log menu and Log dialog box will prompt as shown below

Here log file can be selected and viewed.
